MISSION & JOURNEY

PMIT Technology is an initiative of PMIT GROUP. PMIT Group was established in 2019 with the virtuous objective of bringing various business sectors in a one roof.

Starting with education in last few years we have served successfully more than 7000 students since our inception in various courses. And there is no hesitation to state that this huge task was possible through successfully integrating education system management with IT and ITE'S, and our vision was to build a centralized system of operation which will include admissions, accounting, operations and administrative sectors under one roof thus trying to reduce the excess manpower which was required in the old system.

To cater the large no of employee and huge no of student we have introduced several management modules like LMS, Admission Management System, Employee Management System, Front Desk/Visitor Management system, Record keeping management, Accounts-Financial management model, Faculty Management Model, College Management System, HR Management System within a span of 3 years which would not had been possible without a strong support from a dedicated team. Thus, small modules to cater requirements of each section in a customized manner was developed.

Having Expertise and having tested the whole module in the best way for four long years we decided to develop a new company in the name and style of PMIT TECHNOLOGIES PRIVATE LIMITED so that we can venture into the vast IT world and undertake new assignments.

THE COMPANY

1 PMIT Technology is an initiative of PMIT GROUP to integrate education system management with IT and ITE'S.

2 Since Inception,12 colleges has been managed by us with the help of IT Division.

3 More than 7000 students are served successfully till date.

4 More than 100 employees has been managed through our own system.

5 To date back, our Technological Activities was started from 2020 onwards and we are not novice rather our system has already been tried and tested in various models which has been possible through our highly trained and dedicated work force.

6 After successful application in our own field PMIT Technologies was incorporated in the year 2024 to venture into the vast IT world to undertake new challenges.
